1. What is this?

This is a template for easily making slides. This includes layout file written by haml, contents of the slide written by markdown, a javascript library to make slides using HTML, and themes.

2. How to use

```
$ git clone git://github.com/naoty/slide_template slide_title
      $ cd slide_title
      $ bundle install
      $ bower install
      $ vi content.md
      $ rake
      $ open index.html
```

3. Contributing

If you make themes for your own, welcome your pull request to include it in the template themes!
